## Architecturally Inspired Collections

### ASHFIELD

With the turning seasons, fabrics change from floral cottons to wool plaids, and centerpieces from wildflowers to dried grasses. Souvenirs from recent travels mix with treasured family heirlooms and flea market finds. Collections abound. Fashionable and flexible, this seemingly eclectic style brings together time-honored country traditions.

### Avalon

Cooling breezes. A hint of moisture in the air. Life is easy and interiors are oriented to the water. Uncomplicated style and light, sun bleached colors populate this house. The Avalon has a slight touch of the coast, aesthetically coexisting with any color scheme or decor.

## Rustic Finishes

The saying "What's old is new again" certainly has relevance in today's design trends, and at Kwikset there is no exception. Kwikset Signature Series is proud to offer three additional finishes with old world charm; **Rustic Pewter, Rustic Bronze and Iron Black.**

## SmartKey Security

ANSI/BHMA  
(American National Standards Institute)

### SECURITY

For the very best in residential security, make sure the deadbolt has these important features:

### ANSI GRADE 1

Locks are rated by an independent agency (ANSI). GRADE 3 security provides good residential protection – GRADE 1, the best. SmartKey withstands the highest level of UL pick testing, the UL 437, Par. 11.6.

### BumpGuard™

Improved security against lock bumping and lock picking.

\* SmartKey is available in all Kwikset Signature Series keyed entry products, except 907 SmartCode.

### 1 KEY IT YOURSELF

Lock is rekeyable in less than 30 seconds by using the included learn tool without removing the lock from the door.

### 2 BUMPGUARD™

Patented side locking bar technology replaces a traditional pin & tumbler design to protect against lock bumping.\*

### 3 DRILL RESISTANCE

Cylinder uses two steel balls inserted into the front of the key face to resist attack from drilling.

### 4 NEW TECHNOLOGY

Locking bar, racks and pins are made out of stainless steel for increased strength & durability.

\*Lock bumping - an attack technique using specially cut keys that can defeat conventional pin & tumbler locks.
